

PRESERVING NATURE IN NIAGARA, FOREVER

LOCATION: Central Niagara – Community Venue
680 York Rd, Niagara-on-the-Lake, ON L0S 1J0

DATE: Sunday, June 21st, 2026

TIME: 3:30PM (doors open at 3:00 pm)

The Niagara Land Trust invites you to a free public event exploring a bold, greener vision for the future of the Niagara Peninsula – one rooted in conservation and the protection of our most important natural spaces. If you care about preserving forests, wetlands, and wild places in Niagara, this is an event not to miss.

Featured speaker Adam Shoalts, Ph.D. – explorer and national bestselling author, described by the Toronto Star as “Canada’s Indiana Jones” and by CBC as “one of

the greatest living explorers” – will share compelling stories and images from his expeditions. From paddling 3,400 km from Lake Erie to the Arctic to exploring some of the most remote landscapes in North America, Shoalts will connect his experiences in the wild to the importance of protecting natural spaces here at home.

Looking forward to seeing you then.

All welcome!
